USM Review

USM Analysis

Add key functionality to the ideas page.

Rework the backend in order to correctly display required fields (PDCA, User Division/Unit, Idea Comments)

Updates:

As we had to rework backend, not all planned MVP 2 features were completed

These features have been moved to MVP 3

USM Analysis

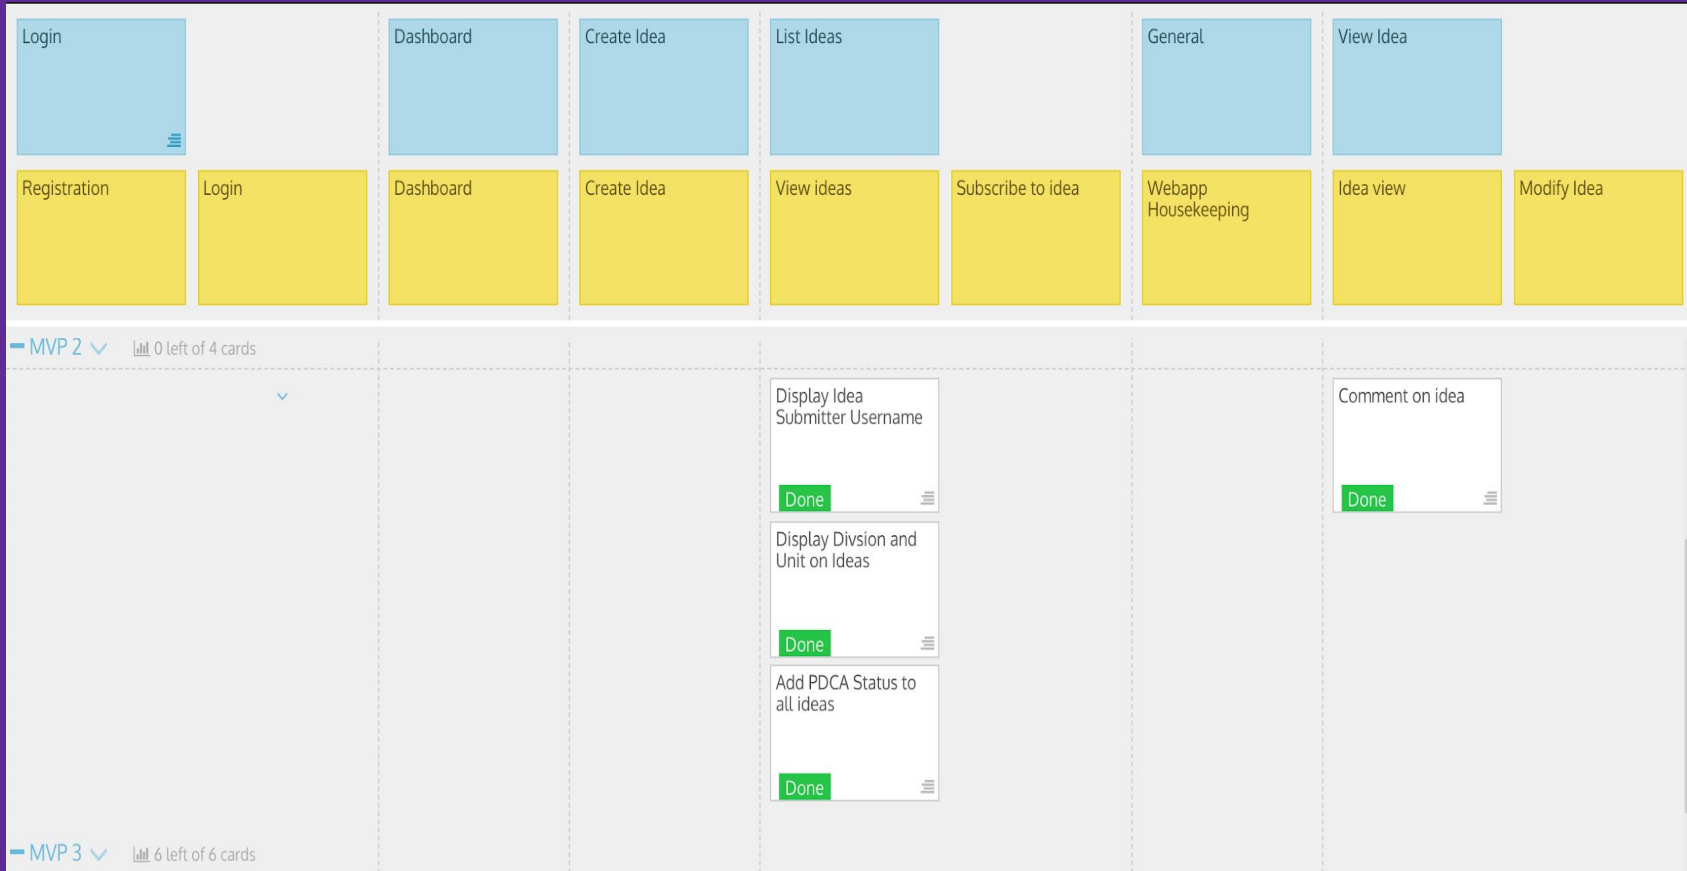

Rationale:

- Increase functional requirements displayed on our Ideas page.
- Build a scalable backend that will be more friendly for new features

Time Management:

- Pair Programming to streamline development
- Plan frontend changes on paper first
- Ensure no one was out of scope
- Meetings/Coding sessions after class

Updated USM for MVP 2

Team Roles

Presentation: Taylor, Paul

Database: Taylor, Danish, Bryce

UI/UX Design: Paul and Taylor

Backend: Taylor and Brandon

Frontend: Paul and Maks

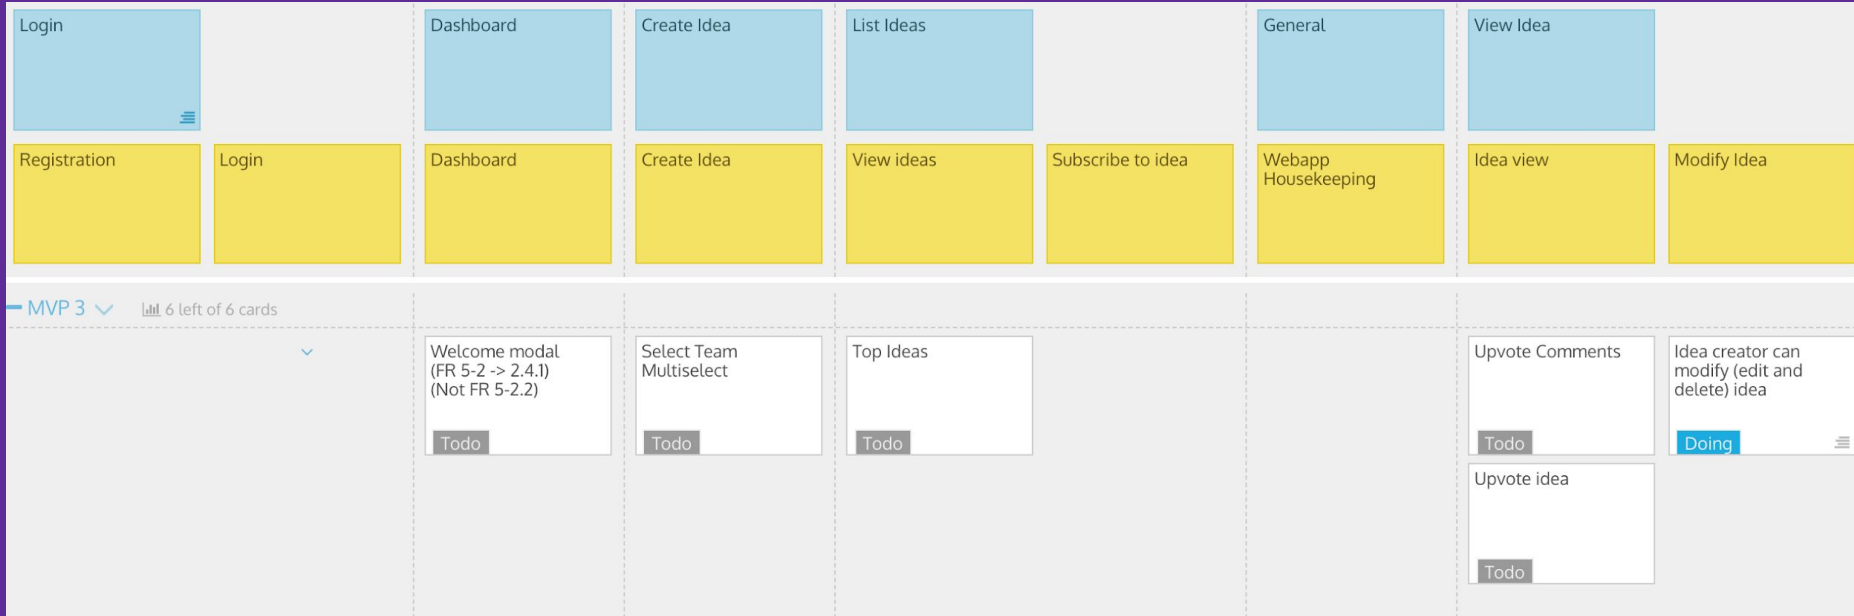

Documentation (USM): Paul

MVP 3 Demo

Demo Comments & Review

USM for MVP 3

Group Reflection

How did you feel about this milestone?

What did you like about it?

What did you dislike?

We started this milestone a little burnt out which cause some team conflicts, however we rallied and pulled it together and we are optimistic moving forward. Also ran into some 'growing pains' with our DB that were resolved

Group Reflection

What did you learn about yourself as you collaborated and worked through this milestone?

We learned that when we fragment and don't put priority on communication it causes more issues and results in problems for all of us.

Group Reflection

How will you use what you have learned going forward?

We are all growing more comfortable with C# and ASP.NET which will help us be more productive on future MVPs, this knowledge will also lend well in our careers.

Group Reflection

What “stuff & things” related to this milestone would you want help with?

Help with building a backlog with as little task collision as possible as at times we find ourselves blocked.

Questions?
